CITY STATEMENT ON 301 MISSION HOMEOWNERS' PERMIT APPLICATION

“Today, the City received permit applications from 301 Mission homeowners to install piles and take other actions at their building. Public safety is our top priority. We will process these permits expeditiously with peer review from experts and thorough analysis by City agencies. The review will include environmental at Planning, structural at DBI and survey of the right of way by Public Works. City departments will work with the homeowners to ensure the structural fixes will protect all residents and the public.”

The City plans to have additional comment after this review is complete.
